

PHASE 1 – BRAINSTORMING & IDEATION PHASE

Project Title: FitBuddy – AI Fitness Plan Generator using Gemini Models

Team Members: Vennila, Varsha, Vijayalaksmi, Vaishnavi

1. Introduction

FitBuddy is a Generative AI based fitness planning project that uses Gemini models to generate personalized fitness plans based on information provided by the user. The project is intended to provide simple, structured and easily understandable fitness guidance.

2. Problem Statement

Many people find it difficult to create a suitable workout routine because fitness goals, activity levels and available workout time differ from person to person. FitBuddy aims to provide an AI-assisted way to generate a basic personalized fitness plan from user-provided information.

3. Proposed Idea

The proposed system, FitBuddy, will collect basic user details such as age, fitness goal, activity level and number of workout days. Gemini will process the information and generate a suitable fitness plan containing recommended activities and a structured routine.

4. Objectives

- To develop a simple AI-based fitness plan generator.
- To use Gemini models for generating personalized fitness suggestions.
- To provide a user-friendly way to enter fitness-related information.
- To generate a structured fitness plan based on the user's inputs.
- To demonstrate the practical use of Generative AI in a real-world application.

5. Proposed Key Features

Feature	Description
User Input	Collect basic details such as age, goal, activity level and workout days.
AI Processing	Use Gemini to process the user's information.
Fitness Plan Generation	Generate a structured fitness/workout plan.
Personalized Output	Adapt the response according to the user's selected goal and details.
Simple Interface	Provide an easy-to-understand interface for entering details and viewing results.

6. Expected Outcome

At the end of the project, FitBuddy is expected to accept basic fitness information from a user and produce an AI-generated, structured fitness plan using Gemini models.

7. Team Responsibility – Initial Ideation

Member	Primary Responsibility
Vennila	Team coordination, brainstorming and requirements
Varsha	Project design and planning

Member	Primary Responsibility
Vijayalaksmi	Development and testing coordination
Vaishnavi	Documentation and demonstration coordination

8. Conclusion

During the brainstorming and ideation phase, the team identified the project idea, problem statement, objectives and proposed features of FitBuddy. The next phase will focus on analysing the detailed requirements needed to develop the project.
