

PHASE 7 – PROJECT DOCUMENTATION PHASE

Project Title: FitBuddy – AI Fitness Plan Generator using Gemini Models

Team Members: Vennila, Varsha, Vijayalaksmi, Vaishnavi

1. Documentation Overview

The documentation phase organizes the complete FitBuddy project so that evaluators and future users/developers can understand the purpose, requirements, design, implementation, testing and usage.

2. Documentation Contents

Document/Section	Content
Project Overview	Project title, problem statement, objectives and proposed solution.
Requirements	User, functional and non-functional requirements.
Design	Architecture, workflow, interface and data flow.
Planning	Technology plan, tasks, milestones and responsibilities.
Development	Implemented modules, application workflow and setup details.
Testing	Test cases, actual results, issues and corrections.
User Guide	How to enter details and generate a fitness plan.
README	Project description, features, technology, setup, usage and links.
Demonstration	Demo video link and explanation of the working application.

3. Suggested README Structure

- Project title and short description.
- Problem statement and objectives.
- Key features.
- Technology stack.
- System workflow.
- Installation/setup instructions.
- Gemini configuration instructions without exposing secrets.
- How to use the application.
- Screenshots.
- GitHub repository information.
- Demo video link.
- Team members.

4. User Guide

- Open the FitBuddy application.
- Enter the requested fitness information.
- Select or enter the fitness goal.

- Select activity level and workout days.
- Add optional preferences if needed.
- Submit the form.
- Read the generated structured fitness plan.

5. Documentation Quality Checklist

- All phase documents use the same project title and team names.
- Screenshots correspond to the actual application.
- Links are checked before submission.
- No API key or private credential is included.
- Actual testing results are recorded.
- GitHub repository contains the required project files.

6. Documentation Conclusion

The documentation phase consolidates the project's technical and user-facing information and prepares it for final demonstration and submission.
